Resorts

Solitude Lembeh Resort
Lembeh Strait, Indonesia

Located on just over half a hectare in North Sulawesi, Indonesia, Solitude Lembeh Resort is a remarkable retreat that boasts a rich history of cherished friendships and enduring values. The resort's distinctive blend of cultures and fascinating past make it a truly one-of-a-kind destination. Guests can choose from two Seafront Villas, eight Garden Villas, and eight Deluxe Rooms, all designed to provide an authentic and comfortable experience. With a combination of traditional Indonesian architecture and modern amenities, each villa offers a cozy ambience where guests can easily unwind and relax. The resort's main goal is to create a peaceful and restorative haven for guests, giving them a chance to recharge and unwind. The Solitude team is dedicated to making every moment of guests' stay memorable, ensuring they leave with unforgettable and revitalising experiences.

Lembeh Strait, one of the most famous dive destinations in the world, is an absolute must for divers venturing to Indonesia.

Lembeh has become world renowned for its plethora and diversity of critters with many found

only in the local area such as the Hairy Octopus or Lembeh Sea Dragon.

Divers can expect mild currents, low surge and shallow sites, making the area suitable for divers of all experience levels from a beginner to the veteran photographer. The water temperature varies depending on the time of the year, with the lowest being in July and August when the temperature drops to around 25°-26° degrees Celsius or 79°- 81° Fahrenheit. Please refer to page 8 for our Water Temperature Guide. To ensure your comfort we recommend that you bring a 3mm with a vest or a 5mm wetsuit, especially if you are planning on doing several long dives a day. We have additional layers for rent if you find you need more warmth.

Our primary focus is on macro and critters, so visibility is not typically a major concern for us. Nevertheless, it is worth noting that we occasionally encounter excellent visibility of up to 40 meters on the East of Lembeh, while inside the strait, the average visibility is around 10 meters.
